FALL 2007

A UNIQUE SCHOOL!

Welcome to Summit Learning Centre – a unique school in the Mission Public School District. Our mandate includes educating individuals of all ages – from five year olds to adults. We have three distinct groups of students:

- 1) Children in Kindergarten to Grade 9 take all of their courses with us.
- 2) Students in grades 10, 11 and 12 have the choice of being enrolled with us fulltime or they may choose to take one or two courses at Summit while being enrolled in their neighbourhood High School.
- 3) Adults may enroll in grade 10, 11 and 12 courses at no charge.

SUMMIT LEARNING CENTRE IS A DISTRIBUTED LEARNING SCHOOL

Distributed Learning means that you as a student learn mainly at a distance from your teacher whether you are at home or at another school. The educational program is directed and supervised by a British Columbia certified teacher and all courses meet provincial standards outlined in the School Act.

Our program has changed this year to ensure that on-going assessment and evaluation are provided by Summit teachers so that students receive timely and helpful feedback as they learn. We are excited about the many additions to our program this year, and look forward to continuing to enhance our service to students and families.

Future directions include continued development of on-line courses, development of increased assessment rubrics and continued development of course materials for elective subjects. We appreciate the patience, hard work and thoughtful input of Summit students and parents as we fine-tune our new program!

Our teaching staff are caring and supportive individuals who communicate with our students in person, by email, telephone, and through Elluminate Live, our virtual classroom. We will work hard to individualize courses and programs to meet the needs of each student.

ARTSMARTS! — WE ARE PROUD OF THESE SPECIALTY PROGRAMS !

Horseback riding, Musical Theatre productions, gymnastics, pottery, sports classes, guitar lessons, ice skating, swimming, scuba diving, canoeing, circus performing, jump rope, photography, kayaking, cooking classes, computer animation, drum lessons, hands-on science experiments....the list goes on!

These cross curricular activities are available to all of our full time students at no charge. This enables our students to participate in activities that meet Prescribed Learning Outcomes but may be difficult to achieve because of specialized instruction, equipment, and venue.

In addition to these classes, we have weekly fieldtrips to educational places such as Burnaby Village, Fort Langley, Vancouver Space Centre, Chinatown, Pacific Press, Vancouver Police Museum, Trout Hatchery, Port of Vancouver, Aviation Museum, Vancouver Symphony...and many more!

ArtSmarts is also an excellent way to practice social skills and meet other Distributed Learning Students and parents.

Whether you are a High School student who wants to take courses that aren't available at your school or in your timetable, an adult who wants to upgrade for work or to further your education, or a parent who wants the opportunity for your child to learn at home through Distributed Learning, the staff at Summit Learning Centre is available to help you achieve your educational goals.
